EDUCATION

Bachelor of Science in Mathematics <i>Bahauddin Zakariya University — Multan, Pakistan</i> Core coursework: Linear Algebra, Real Analysis, Complex Analysis, Abstract Algebra, Topology, Differential Equations, Multivariable Calculus, Probability & Statistics.	Expected 2028
Intermediate in Pre-Engineering / General Science <i>Government Science College Boys — Multan, Pakistan</i>	2024
Matriculation <i>Government Comprehensive Higher Secondary School — Multan, Pakistan</i>	2022

EXPERIENCE & LEADERSHIP

Group Lead — Future Builders - Lead a group working on AI, coding, software development, and team projects. - Backend Lead on AI SkillBridge, an AI-powered career and skill development platform; recognized with a Certificate of Appreciation by the Department of Mathematics, BZU Multan.	2026 – Present
Founder & E-Commerce Manager — RZ Commerce - Design, build, and run an online skincare store, from storefront to WhatsApp checkout. - Manage product listings, customer orders, branding, and day-to-day store operations.	2025 – Present
E-Commerce Seller (Dropshipping) — Walmart Marketplace Ran an independent dropshipping business: product research, listings, pricing, and order fulfillment through suppliers.	2026

RESEARCH INTERESTS

- Pure & Applied Mathematics: Complex Analysis, Operator Theory, Topological Dynamics, Abstract Algebra.
- Computational Modeling: Linear Regression Algorithms, Data Visualization, Numerical Methods.

ACADEMIC & TECHNICAL PROJECTS

RZ Data Analytics AI Agent — Developer - Built a browser-based AI data analyst: upload CSV, Excel, or JSON files for instant dashboards, data-quality scoring, and anomaly detection. - Used Google Gemini function-calling so answers are computed exactly across the full dataset instead of estimated; added SQL generation, report writing, and PDF export. - Built with JavaScript, Supabase (auth, Postgres, rate limiting), and Vercel serverless functions; installable as a PWA (rz-data-analytics-ai-agent.vercel.app).	Aug 2026
AI SkillBridge — Backend Lead (Team Future Builders) Led backend development of an AI-powered career platform that builds personalized roadmaps from a user's education, skills, and goals (ai-skillbridge.vercel.app).	2025
Pakistan Corporate Sector Analytics Dashboard — Personal Project - Built an interactive Excel dashboard using Pivot Tables and Power Query to process corporate datasets. - Performed data cleaning and visual metric modeling to evaluate performance across major enterprise sectors.	Aug 2026
Linear Regression Model — Personal Project Built student marks prediction from scratch in Python and NumPy using multivariate linear regression and gradient descent, without scikit-learn.	
StockFlow — Inventory Management System (In Progress) Designed a MySQL schema with triggers that update stock automatically and block overselling; built a responsive dashboard with low-stock alerts.	2026
International Science & Technology Poster Competition — Participant - Authored and presented a research poster on practical applications of higher-level mathematics in modern technology. - Structured a slide presentation explaining theoretical mathematical formulations for an academic audience.	May 2026

CERTIFICATES & ACHIEVEMENTS

- FICPFSIT-2026 (international conference): research poster presentation and participation certificate.
- Certificate of Appreciation, Department of Mathematics, BZU Multan: Backend Lead, AI SkillBridge (17 Sep 2025).
- Online courses: HarvardX (edX) Remote Work Revolution for Everyone, 2026; Alison Business Analytics.
- Code Meet Seminar: participation certificate.

TECHNICAL & MATHEMATICAL SKILLS

- Mathematical Software: Python (Pandas, NumPy, Matplotlib, Scikit-learn), Maple, Jupyter Notebook, Microsoft Excel.
- Programming & Platforms: Python, JavaScript, React, Next.js, SQL (MySQL, Supabase), Git & GitHub, Vercel.
- Languages: English (Professional Working), Urdu (Native).
